

CUE PATCH NOTES

Version 1.8.122 – August 5th 2015

CUE 1.8.122 is the latest release for our RGB line of peripherals and contains a multitude of changes and enhancements.

Fixes

- Resolved issue with international keyboard layouts and macro output.
- Resolved a rare issue with Right Alt unable to hold input.
- Resolved issue with holding button to switch modes.
- Resolved issue with Alt-Tab while changing modes.
- CUE devices will no longer show up twice incorrectly under Devices.
- Resolved an issue with VOID headsets and Dolby Pro Logic IIx.

Important Note

If you have updated your keyboard to **FW 1.20 or newer, software older than 1.5.108 will no longer be compatible.**

Please ensure you always have the latest software available when updating the firmware to prevent incompatibility.

Firmware updates are done through the software itself under Settings -> Device -> Update Firmware.

Keyboard Connectivity

Connecting via USB 3.0:

Use one connector (the one with the keyboard icon) when connecting via USB 3.0

Connecting via USB 2.0:

Use both connectors when using USB 2.0.*

* Plug in the connector with the two arrows icon first, and the connector with the keyboard icon second.
